

*“We Make Your Safe **PERFECT**”*

SINCE 1938
perfectsafe.in

The Story Of PERFECT

PERFECT born out of a gradual metamorphosis from M/s. Luhar Jadvji Raghavji established by shri Bhimjibhai Jadvjibhai Luhar in 1938. this long journey of excellence has made PERFECT synonymous with quality and trust PERFECT is an antity that stands for durability, Reliability and Affordability.It offers a complete product range of security Equipments. Fire and burglar Resisting safe, Strong Room doors, safe Deposit locker, Cabinets, Safe cum safe Deposits lockers, Cash box, Coffers and special quality heavy steel cupboards.

Ever since its inception PERFECT has chosen to walk the path of precision and innovation. The company is constantly alive to the technological evolutions of the industry and thus it has always been a forerunner in adopting the latest and innovative technologies. Each unit at PERFECT is designed to offer your value for money by its team to technical experts having experience of more than three decades in the field.

Over the years the company has developed its own simple but efficacious methodologies of customer services. It understands the specific needs and requirements of the customers and offers complete support at all times.

Why Perfect ?

- ✓ Indigenous Product with latest technology.
- ✓ Quality safe manufacturer since 1938.
- ✓ Minimum time delivery.
- ✓ PAN India Presence.
- ✓ LifeTime Warranty.

If it's a safe, it has to be PERFECT...

26"H x 21"W x 21"D
400KG

30"H x 24"W x 24"D
530KG

36"H x 27"W x 24"D
700KG

42"H x 27"W x 24"D
800KG

★ **Wide Range :**
Perfect offers safes size 26" to 81" to cater to the requirement of Jewellers to bank and ensure safety and security of your valuables.

★ **Technical Details :**
Perfect safe's body is specially manufactured from 5 mm thick tough steel plate of multibends with round corners without any rives with suitable reinforced and anchored to the body. The body thickness on all five sides is 100 mm including double duty barrier materials which offers fire as well as burglar resistance.

★ **Door :**
The most frequently attacked portion of safe, the door is given superior protection with a series of barriers. The door is made by heavy thick and tough steel plates reinforced with drill, Hammer and Oxyacetylene resistant resistant special alloy plates covered with thick M.S. plates. The total thickness of the door is 69 mm and overall thickness of the door is 150 mm.

★ **Unpickable Locks :**
The Perfect's safe are fitted with superior quality dual control high precision 10 level lockers. These locks are unpickable and only the original keys will open them. Stainless steel keys are supplied in duplicate. The locks are of a Brass Body, unlike most other Brands.

WIDE RANGE WITH EXTRA SAFETY

48"H x 30"W x 24"D
1000KG

60"H x 30"W x 30"D
1350KG

72"H x 30"W x 30"D
1550KG

★ **Bolt work Mechanism :**

Depending on the size, models of Perfect safes have a varying number of retractable shooting bolts as indicated in the table of specifications. Strong movable shooting bolts on either side are evenly spaced to secure the door behind the solid jamb box. Two step lock case construction offers better resistance against fire and burglar attacks.

★ **Balanced pressure Bolt-work :**

A special feature of the balanced pressure bolt work ensures safety from attacks by dislodging. Any pressure exerted on the lock bolt on one side automatically brings into play equal balancing pressure on the opposite side to neutralize and defeat the attempts to dislodge the lock.

★ **Perfect's Auto Re-locking System:**

Adopting the latest technological advancement Perfect's safes are fitted with dead lock device which is activated by a minor attack of any part of the door and lock will get deadlocked instantly. In case of other makes safes, in spite of top claims, the safes are not fitted with such unique lock facility.

★ **Choice of Locking Arrangements :**

The following locking arrangements can be provided in lieu of or in addition to existing locks at an extra cost. Dual Control Locks : Additional dual-control locks can be fitted in large models.

72"H x 42"W x 30"D

2050KG

81"H x 36"W x 30"D

2000KG

★ **Unbeatable Numerical Combination Lock :**

Keyless numerical 3 wheel combination lock offers a choice of nearly a million combinations for setting and resetting. The dial of the lock can be made inoperative by locking it for additional security. The combination locks can be fitted even after the installation of the safe at the user's premises.

★ **Time Lock :**

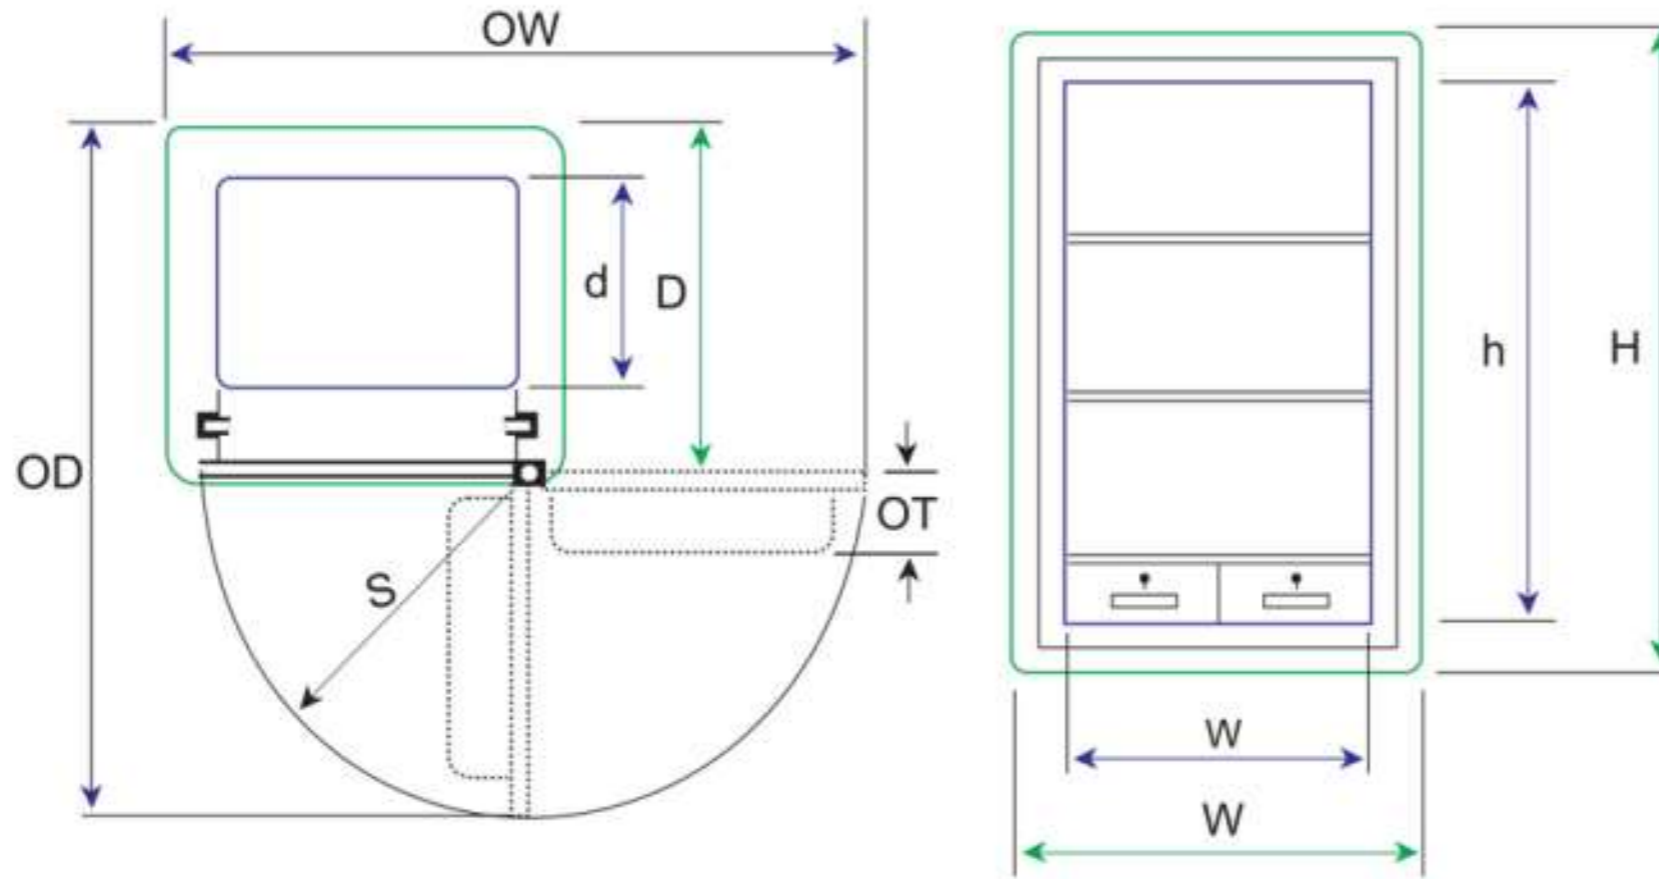

This lock is for additional security of various models of safe from 42 to 81. It can be retro-fitted with imported superior quality electronic/ mechanical time lock with multiple clock movements.

★ **Hybrid Combination Lock :**

Electronic cum Mechanical two in one lock.

Perfect Safes are useful for :
Jewellery Showrooms, Petrol Pumps, Homes, Offices, etc.

Strong Room Doors

perfectsafe.in

72"H x 30"W

Door Slabs:

The thickness of outer composite slab is 16mm. Tough quality M.S. plates are interspaced with layers of power drill, oxyacetylene flame and arc cutting resistant alloys. The door slab is further fortified by layer of barrier material which provides greater dependable protection against fire and attacks of power drill, oxy- acetylene flame and arc cutting.

Door Frame:

Special quality Heavy MS plate is used for fabrication of the door frame. For strength and rigidity the door frame is suitably reinforced along the height and width. A special 'Box-Jamb' is welded to the frame to provide strong rebate for the shooting bolts.

High Security Locks:

Doors are fitted with two superior quality dual control high precision 12 - Level brass body locks. Stainless steel keys are supplied in duplicate. External 3 wheel numerical lock which offers nearly 100 million combinations for setting and resetting can be provided or superior quality imported time locks with multiple clock movements can be fitted.

Automatic Re-locking Device:

Doors are fitted with sensitive reliable re-locking device. In case any attempt is made through the keyhole either using any tools or with the help of explosives then this device get activated and deadlock the bolt work for added protection.

Tough Bolt Work Mechanism:

To secure the door, 12 shooting bolts(each of 38mm diameter) are provided, six in front and six at the rear which slide behind the tough "Box-Jamb" rebate. These bolts can be activated simultaneously by the movement of the handle.

Balanced Pressure Bolt Work:

It provides protection against attempts of dislodging of the locks. If any pressure is applied on the lock bolt on one side, this indigenous mechanism automatically brings into play on the opposite side by an equal neutralizing pressure, thus frustrating the attempt.

Adjustable Strap Hinge:

The hinges are properly aligned both vertically and horizontally for ensuring smooth and easy operation of the door.

Grille Gate:

For convenience of working in the strong room, a well-designed grill gate can be provided which is secured with high precision 8-lever lock operatable from both sides.

Useful for : Jewellery Showrooms, Banks, Gold Preservers
